PROFESSIONAL SUMMARY

I am a Full Stack Developer specializing in the MERN stack and currently pursuing B.Tech in computer science. With robust skills in React, Node.js, express, MongoDb and Python development, I have developed scalable applications and API designs. My background in authentication, cloud functions, and modern UI practices enables me to deliver impactul solutions across various domains.

EDUCATION

- **Vivekanada Global University**   *July 2023 - July 2026**
  B.Tech(CSE)   Jaipur, India
  ◦ CGPA: 8.15/10.00

SKILLS

- **Programming Languages: JavaScript, TypeScript, Python, C**
- **Frontend: React.js, SvelteKit, Tailwind CSS, HTML, CSS**
- **Backend: Node.js, Express.js, Firebase**
- **Database: MongoDB, MySQL**
- **Version Control and Tools: Git, GitHub, Redux, VS Code, Postman**

INTERNSHIP EXPERIENCE

- **Tensax Innovation Lab** | [🌐]   *Feb 2025 - May 2025*
  Full Stack Intern   Jaipur, India
  ◦ Engineered and optimized 3+ web and hybrid applications, improving load performance by 30 percent through efficient component rendering with React.js and SvelteKit.
  ◦ Integrated MongoDB Atlas with secure authentication workflows, reducing user login-related issues by 20 percent and improving account security.
  ◦ Built 10+ reusable UI components using Tailwind CSS, cutting frontend development time by 25 percent across modules.
  ◦ Collaborated with UI/UX and backend teams to deploy scalable features via AWS and Capacitor for multi-platform support.

PROJECTS

- **Move Ease – The Smart Way to Move**   *Mar 2025 – Aug 2025*
  Tech: React, Node.js, Express.js, MongoDB, JWT Auth, Google Maps APIs, Tailwind CSS, Vercel, Render
  ◦ Architected a full-stack movers marketplace with booking, dashboard and authentication.
  ◦ Configured Google APIs for real-time distance calculation and auto-pricing.
  ◦ Implemented Express, MongoDB Atlas and JWT auth for secure backend workflow.
  ◦ Fully deployed — Frontend on Vercel + Backend on Render.
  Live: move-ease-the-smartway-to-move.vercel.app

- **Job Lane – Connecting Talent and Opportunity**   *Oct 2025 – Dec 2025*
  Tech: React, Node.js, Express.js, MongoDB, JWT Auth, Tailwind CSS
  ◦ Launched a job portal supporting role-based login for job seekers and recruiters.
  ◦ Designed REST APIs and MongoDB schemas for users, jobs and applications.
  ◦ Implemented secure session handling using Firebase Authentication.
  Code: github.com/riteshkr7578/JobLane

CERTIFICATIONS

- **Management Information System**   *Dec 2024*
- **Workshop on Prompt Engineering and Ai Tools**   *April 2024*
