Jaipur, Rajasthan - 302017, India

PROFESSIONAL SUMMARY

I am a Full Stack Developer specializing in the MERN stack and currently pursuing a B.Tech in Computer Science. With robust skills in React, Node.js, Express.js, MongoDB, and Python development, I have developed scalable applications and API designs. My background in authentication, cloud functions, and modern UI practices enables me to deliver impactful solutions across various domains.

EDUCATION

- Vivekananda Global University** July 2023 - July 2026
B.Tech(CSE)
◦ CGPA: 8.15/10.00 Jaipur, India

SKILLS

- Programming Languages:** JavaScript, TypeScript, Python, C
- Frontend:** React.js, Next.js, Tailwind CSS, HTML, CSS
- Backend and APIs:** Node.js, Express.js, RESTful APIs, JWT Authentication, MVC Architecture
- Database:** MongoDB, MySQL
- Version Control and Tools:** Git, GitHub, Redux, VS Code, Postman, Vercel, Render

INTERNSHIP EXPERIENCE

- Tensax Innovation Lab** |  Feb 2025 - May 2025
Full Stack Intern Jaipur, India
 - Engineered and optimized 3+ web and hybrid applications, improving load performance by 30% through efficient component rendering with React.js and SvelteKit.
 - Integrated MongoDB Atlas with secure authentication workflows, reducing user login-related issues by 20% and improving account security.
 - Built 10+ reusable UI components using Tailwind CSS, cutting frontend development time by 25% across modules.
 - Collaborated with UI/UX and backend teams to deploy scalable features via AWS and Capacitor for multi-platform support.

PROJECTS

- Move Ease – The Smart Way to Move** Mar 2025 – Aug 2025
Tech: React, Node.js, Express.js, MongoDB, JWT Authentication, Google Maps APIs, Tailwind CSS, Vercel, Render
 - Architected a full-stack movers marketplace with booking, dashboard, and authentication.
 - Configured Google APIs for real-time distance calculation and auto-pricing.
 - Implemented Express, MongoDB Atlas, and JWT authentication for secure backend workflows.
 - Designed scalable REST APIs with role-based authentication and optimized MongoDB queries for production deployment.**Live:** move-ease-the-smartway-to-move.vercel.app
- Talk Fusion – Full Stack AI Chat Application** Oct 2025 – Nov 2025
Tech: React (Vite), Tailwind CSS, Express.js, MongoDB, Groq AI, Axios, Render
 - Built a full-stack AI chat application enabling real-time, multi-turn conversations with a responsive, production-grade UI.
 - Integrated LLM APIs with backend-managed prompt construction and conversation context injection for multi-turn AI interactions.
 - Designed backend workflows for AI response handling, error management, and rate-limit safety, simulating real-world AI production systems.**Live:** talk-fusion-chat.vercel.app/

CERTIFICATIONS

- Management Information System** Dec 2024
- Workshop on Prompt Engineering and AI Tools** April 2024

ADDITIONAL INFORMATION

Languages: English, Hindi
Interests: Exploring New Technologies, Watching Cricket.
