EDUCATION

Vivekananda Global University

B.Tech in Computer Science and Engineering | CGPA: 8.30

Jaipur, IN

June 2023 – June 2026

EXPERIENCE

Software Development Engineer Intern

Feb 2026 – Present

Nodesure Technologies

Jaipur, India

- Contributing to the development of a production CRM platform built with Laravel, Vue.js, Inertia.js, and MySQL
- Implemented RESTful API endpoints using Laravel and Eloquent ORM for CRM functionalities
- Developed reusable Vue.js components to support dynamic user interface features and improve modularity
- Improved database query performance through indexing and query optimization
- Worked on a company landing page using Next.js, focusing on responsive UI and performance optimization
- Developed features for a MERN-based CRM/event management platform used for managing jewellery exhibitions and related event workflows

Full Stack Intern

Feb 2025 – May 2025

Tensax Innovation Lab

Jaipur, India

- Contributed to the development of web and hybrid applications using React.js and SvelteKit
- Improved frontend performance through optimized component rendering, lazy loading, and efficient state management
- Implemented authentication and authorization features using MongoDB Atlas and JWT-based token systems
- Developed reusable UI components using Tailwind CSS to support scalable and consistent frontend development
- Assisted in building RESTful APIs and backend features within the MERN stack
- Debugged application issues and optimized MongoDB queries to improve response time and reliability

Web Developer Intern

May 27, 2024 – Aug 23, 2024

InternPe

Remote

- Built responsive and user-centric frontend systems for multiple projects including a full-stack E-commerce platform
- Developed dynamic UI modules using React.js and modern JavaScript (ES6+), ensuring cross-browser compatibility
- Integrated RESTful APIs and handled asynchronous data flows using Axios and state management techniques
- Collaborated in an agile remote team using Git-based workflows, contributing to sprint-based feature releases

PROJECTS

MoveEase – The Smart Way to Move

Mar 2025 – Aug 2025

- Tech Stack:** React, Node.js, Express.js, MongoDB, JWT, Google Maps API, Tailwind CSS
- Architected a full-stack movers marketplace with booking system, dashboard, and secure authentication
- Integrated Google Maps APIs for real-time distance calculation and dynamic pricing
- Designed scalable REST APIs with role-based JWT authentication and optimized MongoDB queries
- Deployed frontend on Vercel and backend on Render
- Live:** move-ease-the-smartway-to-move.vercel.app

Talk Fusion – AI Chat Application

Oct 2025 – Nov 2025

- Tech Stack:** React (Vite), Tailwind CSS, Express.js, MongoDB, Groq AI, Axios
- Built a real-time multi-turn AI chat application with production-grade UI
- Integrated LLM APIs with backend-managed prompt construction and conversation context
- Implemented rate-limiting, error handling, and secure backend workflows
- Live:** talk-fusion-chat.vercel.app/

TECHNICAL SKILLS

Programming: JavaScript, Python, C

Frontend: React.js, Next.js, Vue.js, Tailwind CSS, HTML, CSS

Backend & Databases: Node.js, Express.js, Laravel, REST APIs, JWT, MVC, MongoDB, MySQL

Tools & Platforms: Git, GitHub, Redux, Postman, VS Code, Vercel, Render
